

## Syringe labelling made easy!

### PraxiLabel™ Syringe Labeller

PraxiLabel is a semi-automatic tabletop syringe labeler intended to increase labeling productivity as it eliminates the work related injuries due to frequent hand and wrist movements involved in the syringe labeling operation.

The labels are pregraduated and may be printed on any heat transfer label printer.

The PraxiLabel uses 3cc, 5cc, 10cc, 20cc, 30cc and 60cc graduated labels and capped, aseptic syringes from MedXL.

Only one set of 2 way snap-in syringe support roller covers all syringe sizes (no tools needed for the change).

- ✓ increases productivity
- ✓ saves time and money
- ✓ reduces repetitive motion injuries

### SPECIFICATIONS

Size : 15" L x 8" W x 10,5" H  
(38cm L x 20,5cm W x 26,5cm H)

Weight : 8 kg / 18 lbs

Power : CE, UR approved universal plug in power supply.
